

MVHR Design, Consultancy and Installation Services

Transform Your Home with VENTI's MVHR Systems

Fresh Air, Energy Savings, and Comfort - All in One System

Are you tired of stale air, condensation, or rising energy bills? VENTI's **Mechanical Ventilation with Heat Recovery (MVHR)** systems are the perfect solution for modern homes. Designed to improve indoor air quality while retaining up to 92% of heat, our systems keep your home fresh, comfortable, and energy-efficient all year round.

Whether you're building a new home, renovating, or upgrading to meet energy efficiency standards, VENTI provides a seamless, end-to-end service tailored to your needs.

Why Choose VENTI for Your Home?

At VENTI, we specialise in delivering **bespoke MVHR solutions** that prioritise your family's comfort and health. Here's why homeowners across the UK trust us:

1. Complete System Integration

- **Precise Design:** Advanced thermal modelling, noise control (<25dB(A)), and pressure loss calculations for optimal performance.
- **Home Compatibility:** Integration with your home's structure and existing electrical systems.
- **Assured Performance:** Post-installation airflow testing, seasonal adjustments, and optional remote monitoring.

2. Premium Materials and Craftsmanship

- Direct sourcing of high-quality components, including semi-rigid ducting, antimicrobial insulation, and discreet ceiling valves.
- Compliance with **BS EN 13141-6:2021** standards for safety and efficiency.
- Rigorous quality checks throughout installation to ensure everything works perfectly.

3. Smart, Energy-Saving Technology

- Heat recovery efficiency: **85-92%**.
- Specific Fan Power: **<0.45 W/(l/s)** for minimal energy consumption.

- Intelligent features like summer bypass, frost protection, and pollen filtration to keep your home comfortable in every season.

The Benefits of MVHR for Your Home

Imagine a home where the air is always fresh, your heating bills are lower, and you never have to worry about damp or condensation. With a VENTI MVHR system, you can enjoy:

- **Healthier Air:** Remove stale air, excess moisture, and allergens to create a cleaner, healthier living environment for your family.
- **Energy Efficiency:** Recover and reuse heat from your home, reducing your reliance on traditional heating and lowering your energy bills.
- **Year-Round Comfort:** Maintain consistent indoor temperatures, with systems that adapt to both summer and winter conditions.
- **Sustainability:** Meet energy efficiency standards and reduce your carbon footprint without compromising comfort.

Start Your MVHR Journey Today

Ready to make your home healthier, more comfortable, and energy-efficient? VENTI's **five-stage consultation process** ensures every system is tailored to your unique needs:

1. Initial feasibility analysis.
2. Bespoke design and material selection.
3. Professional installation by certified experts.
4. Commissioning and performance testing.
5. Ongoing maintenance and optimisation.
