

Replacement FLUXO Filters (Pack 3)

Ensure your **FLUXO system** continues to operate at peak performance with the **VENTI FLUXO Replacement Filters**. This pack of three filters is designed to maintain optimal air quality and efficiency, providing an easy solution for filter replacement. Perfect for maintaining the air extraction system in residential and commercial properties, these filters are essential for effective ventilation and long-term system reliability.

Product Overview

The **FLUXO Replacement Filters** are compatible with **FLUXO decentralised ventilation** units and are designed to capture dust, particles, and other impurities from the air, maintaining healthy indoor air quality. Replacing the filters regularly ensures that your system remains efficient and continues to provide clean air circulation. These filters are easy to install and replace, making maintenance straightforward.

Key Features

- **Pack of 3 Filters:** Each pack contains three high-quality replacement filters, offering convenience and value.
- **Efficient Air Filtration:** Designed to trap dust, particles, and other contaminants, ensuring better air quality and efficient operation of the **FLUXO** unit.
- **Easy to Replace:** The filters are simple to install and replace, requiring no special tools or technical expertise.
- **Compatible with 100mm or 150mm FLUXO Units:** Specifically designed for use with **FLUXO** systems, ensuring a perfect fit and optimal performance.
- **Long-Lasting:** Built to last, providing consistent air filtration over an extended period before needing replacement.

Applications

- **Residential Use:** Ideal for use in homes to ensure clean air circulation through your **FLUXO** system.
- **Commercial Use:** Perfect for maintaining clean and healthy air quality in commercial buildings where air extraction systems are used.

Specifications

- **Model:** FLUXO Replacement Filters
- **Size:** 100mm/150mm (please select)
- **Pack Quantity:** 3 filters per pack
- **Material:** High-efficiency air filtration material

- **Compatibility:** Designed for use with **FLUXO** systems

Benefits

- **Maintains Air Quality:** Helps maintain the air quality by removing dust and other airborne particles.
- **Improves System Efficiency:** Regular replacement of the filters ensures that your **FLUXO** unit operates at peak efficiency.
- **Simple Maintenance:** Easy to replace, ensuring your system stays in good working condition with minimal effort.
- **Cost-Effective:** A pack of three filters provides long-term value, reducing the need for frequent purchases.

Energy Efficiency

Replacing the **FLUXO filters** ensures that the system continues to operate efficiently, reducing strain on the fan and maintaining airflow. Clean filters allow the system to function optimally, promoting energy-efficient ventilation.
