

VELA 100 White External Wall Mount Louvre Vent Grille with Integral Flyscreen

The Essential External Grille: Keep Pests Out.

This is the simple upgrade that makes a major difference to your home's hygiene, ventilation, and look. Protect your system from the outside in.

Ventilation needs to happen 24/7. But when airflow meets the outdoors, you need protection. The VELA 100 delivers reliable performance without compromise. Designed for 100mm ducting, its clean, unobtrusive RAL9003 white finish blends perfectly with any modern façade. More critically, the integral flyscreen acts as a robust barrier. It keeps flying insects, large debris, and small pests out of your expensive ventilation system and your home. Minimal design. Maximum defence.

Simple to fit. Built to last.
