

# Residents in the West of the UK experience more mould problems

The data reveals a distinct geographic divide in an undesirable ranking of properties with mould among major cities. It was found that cities in the western UK are considerably more prone to facing hazardous living conditions.

City	Frequently Experience Mould	Occasionally Experience Mould	Total (Frequent + Occasional)	Source	Date
Cardiff	19%	23%	42%	<a href="#">Opinium Survey</a>	Nov 24-28, 2023
Plymouth	14%	22%	36%	Same as above	Same
Manchester	16%	19%	35%	Same as above	Same
London	10%	22%	32%	Same as above	Same
Leeds	10%	21%	31%	Same as above	Same
Bristol	4%	27%	31%	Same as above	Same
Sheffield	11%	19%	30%	Same as above	Same
Glasgow	14%	15%	29%	Same as above	Same
Liverpool	13%	16%	29%	Same as above	Same
Birmingham	8%	21%	29%	Same as above	Same
Belfast	10%	16%	26%	Same as above	Same
Southampton	10%	14%	24%	Same as above	Same
Newcastle	6%	17%	23%	Same as above	Same
Brighton	14%	8%	22%	Same as above	Same
Nottingham	6%	16%	22%	Same as above	Same
Edinburgh	2%	16%	18%	Same as above	Same
Norwich	2%	10%	12%	Same as above	Same

## Notes:

1. **Calculation:** “Occasionally” percentages are derived by subtracting the “Frequently” percentage from the total (e.g., Cardiff: 42% total - 19% frequent = 23% occasional).
2. **Source:** All city-level data originates from the same [Opinium survey](#) of 2,000 UK adults (Nov 24-28, 2023).
